

## FACCTS – questions

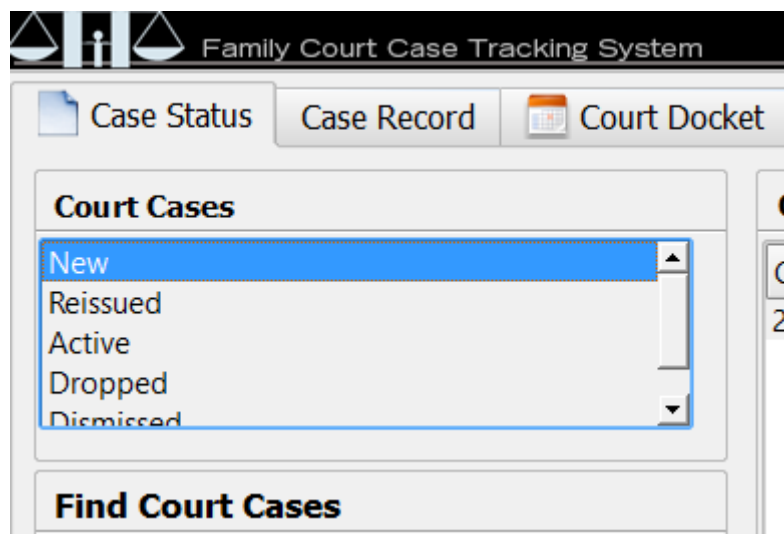

### General

Is there any user role-dependent functionality? Could you explain please the role set and the functionality allowed for each role?

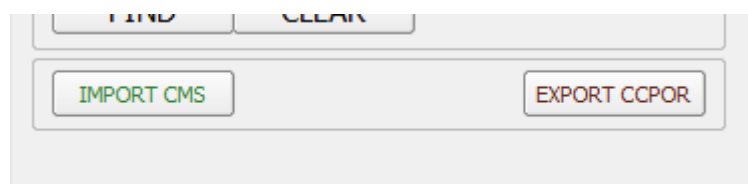

Is there any documentation approximately describing the data structure of the application?

There are some interfaces on mock ups for case input (eCourt, Sustain, Banner). Is there any additional use cases/documentation/functionality/etc. for that ones?

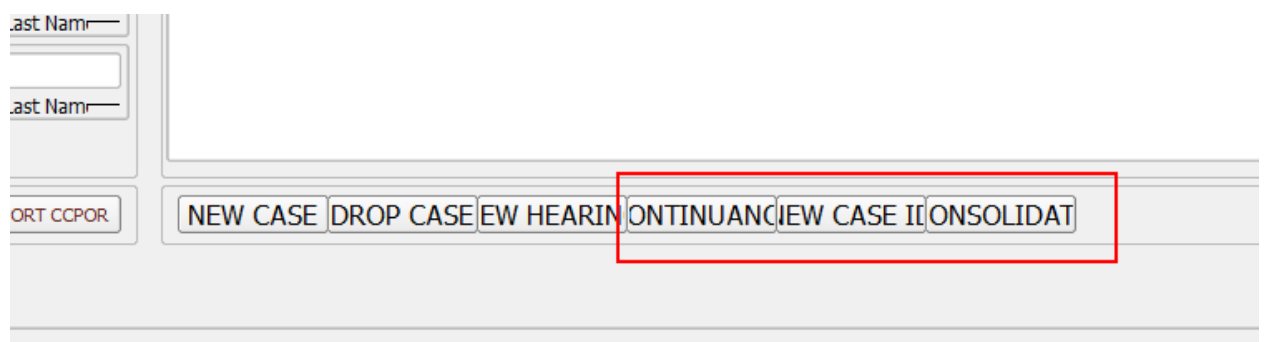

### Case Status

Do you want to choose the single item or multiple ones?

Which workflow is there for “Import CMS” and “Export CCPOR” buttons?

Which workflow/what the program should do if the user press buttons “Continuance”, “New case ID”, “Consolidate”?

## Case record

This screenshot shows the 'Party' section of a web form. It includes a 'Party' label, a text input field for 'Name', a text input field for 'Designation', and a checkbox labeled 'Attorney'. Below the input fields, the labels 'Name' and 'Designation' are visible. The entire section is part of a larger form with tabs for 'Court Staff' and 'Court Settings'.

Do you have any rules related to the control “party” above? For example, if the user press “Attorney” does it mean that “Name” and “Designation” fields leave unfilled?

Are there any rules for “Designation” field?

This screenshot shows the 'Personal Information' section of a web form. It includes a 'Party' label, a text input field for 'Name', a text input field for 'Designation', and a checkbox labeled 'Attorney'. Below the input fields, the labels 'Name' and 'Designation' are visible. The entire section is part of a larger form with tabs for 'Court Staff' and 'Court Settings'. A red box highlights the 'Designation' field, and a red box highlights the 'None' option in the 'Designation' dropdown menu. A red box highlights the 'Pro Per' checkbox in the 'Attorney for Party 1' section.

If the field called Designation (1) changed should that change be displayed in the similar field (2) ?

Are there any validation rules for “Phone”, “Fax” or some else text fields?

This screenshot shows the 'Attorneys' section of a web form. It includes a 'Pro Per' checkbox, a text input field for 'First, Last Name', a text input field for 'Firm Name', a text input field for 'Street Address', a text input field for 'City, State, Zip', a text input field for 'Email', a text input field for 'State Bar ID', a text input field for 'Phone', and a text input field for 'Fax'. The 'Pro Per' checkbox is highlighted with a red box. The 'Attorney for Party 1' label is also visible.

What does mean “Pro Per” checkbox?

Are there any rules for the “Checked/Unchecked” state for that option?
